

Hypothyroidism

& Vaccine Protocol With W. Jean Dodds, DVM

- 09:00 Registration and Coffee
- 09:30 Welcome
Val Harvey - Chairman APDT
- 9:40 Thyroid Disease
Hypothyroidism is the most common endocrine disorder of dogs, and up to 80% of cases result from an autoimmune disease that progressively destroys the thyroid gland (autoimmune thyroiditis).
- 11:00 Tea & Coffee
- 11:15 Vaccine Issues
Modern vaccine technology has permitted us to protect companion animals effectively against serious infectious diseases. However, the challenge to produce effective and safe vaccines for the prevalent infectious diseases of animals has become increasingly difficult. In veterinary medicine, evidence implicating vaccines in triggering immune-mediated and other chronic disorders (vaccinosis) is compelling.
- 12:30 Lunch
- 13:45 Nutrition
Wholesome nutrition is the key to maintaining healthy immune function and resistance to disease. Discussion will focus on the basic ingredients and trace vitamins, minerals, and immune-balancing nutrients that promote healthy endocrine and immune function as they apply to health and disease.
- 15:00 Tea & Coffee
- 15:15 Review and continuation of above topics with Q's and A's.
- 17:00 Close
- 17:15 APDT AGM

Ticket Application Form
APDT Continuing Professional Development Programme
June 9 2012

Venue: Hilton Manchester Airport Hotel, Manchester Airport Outwood Lane
Ringway, Manchester M90 4WP, United Kingdom, Tel: 0161 4353000

Name: _____
